**Algorithm 1** QuickSelect

---

```
procedure QUICKSELECT( $A, k, l, r$ )  
  if  $l == r$  then  
    return  $l$   
  end if  
   $x = \text{Partition}(A, l, r)$   
  if  $k == x$  then  
    return  $A[x]$   
  else if  $k < x$  then  
    return QuickSelect( $A, k, l, x - 1$ )  
  else  
    return QuickSelect( $A, k, x + 1, r$ )  
  end if  
end procedure
```
